SKILLS

Programming Languages

- Python | Java | JavaScript | Dart | React.js

Web Development

- HTML5 | CSS 3 | JavaScript | MySQL | MongoDB

Tools and Framework

- JavaFX | Git | VS Code | Canva

LANGUAGES

- English
- Sinhala

SOFT SKILLS

- Team Work
- Problem Solving
- Adaptability
- Creative Thinking
- Communication
- Time Management
- Documentation & Reporting

PROFILE

A second year undergraduate in Computer Science who enjoys making clean and functional front-end interfaces, but without focusing too much on complex design work. Strong knowledge of Python, Java, JavaScript, and Flutter; slowly developing interest in IT security and algorithms. Passionate about learning new technologies and developing secure, efficient systems that solve real-world problems.

EDUCATION

University Of Westminster UK, affiliated with IIT (2025 - PRESENT)
BSc (HONS) Computer Science

G.C.E. Advanced Level (2022 - 2024)
Prince of Wales' College, Moratuwa.

G.C.E. Ordinary Level (2020 - 2021)
Prince of Wales' College, Moratuwa.

Dip. English and Communication Skills (2025)
University of Moratuwa, Moratuwa.

Dip. Information Technology and Management (2022)
Future Care International Campus, Moratuwa.

Full-Stack Development Program (online) (2026)
University of Moratuwa, Moratuwa.

VOLUNTEERING & PARTICIPATION (2025)

- Volunteer – Algorand Foundation - IIT Workshop Participation
- Participated in the IIT Blockchain Event, contributing as an active participant.

Extracurricular Activities;

- Participated in football, developing teamwork, leadership, and collaboration skills.
- Active member of the Commerce Society, contributing to organizational and event-based activities.
- Practiced swimming, maintaining discipline and physical endurance.
- Played carrom, improving concentration and decision-making abilities.
- Completed a 2-day Leadership Programme, gaining experience in leadership, teamwork, and communication.

PROJECTS

Task Manager Application (Python, Tkinter – 2025)

- Built a GUI-based task manager with options to add, edit, delete, and sort tasks efficiently.
- Used JSON/TXT files for persistent task storage across sessions.
- Implemented OOP with reusable classes to maintain clean and modular code.

Climate Action Website (HTML, CSS, JavaScript – 2025)

- Built a responsive web application to create awareness on climate change.
- Support for animated splash screens, navigation bars, and in-app routing.
- Used semantic HTML and Tailwind CSS for clean, mobile-first layout structure.
- Focused on user-friendly UI, accessibility, and green-messaging.

Govi Sahaya Mobile Application (Flutter – 2025)

- Developed a mobile application to assist farmers in identifying crop diseases and managing agricultural activities.
- Integrated AI-based disease detection and recommendation features for efficient crop management.
- Built using Flutter for cross-platform compatibility (Android & iOS).
- Implemented user-friendly UI, real-time notifications, and offline data storage for better accessibility.
- Applied object-oriented programming and state management for modular, maintainable code.

Algorithm Visualizer (HTML, CSS, JavaScript – 2026)

- Built an interactive web application to visualize algorithms including Bubble Sort, Binary Search, and Matrix Multiplication.
- Implemented step-by-step animations with both automatic and manual modes to improve user understanding of algorithms.
- Designed responsive and user-friendly UI using modern CSS and dynamic JavaScript functionalities.
- Added real-time input handling and visual feedback to enhance learning and engagement.
